

# Glossary of Terms

## Unit 4

**Family engagement:** a family's openness to and support of the young person's enrollment in and use of ongoing care provided by a behavioral health service provider.

**Debriefing:** a discussion with an individual or family that describes results of a screening and what steps that should lead to.

**Perceived barriers to care:** those that stem from someone's knowledge or attitudes about their understanding or misunderstanding of behavioral health treatment.

**Logistical or concrete barriers to care:** those that are based on such things as transportation difficulties, insurance or financial limitations, or lack of childcare coverage.
